## **Emergency Request for Assistance**

The following procedure has been designed to alert the park staff, residents, and guests of an emergency situation.

Using an emergency air horn or a car horn, sound three 1-2 second blasts on the horn within a 10 second time frame. Repeat this signal until help arrives. In an emergency, you can also use your key fob to remotely activate your car horn or car alarm.

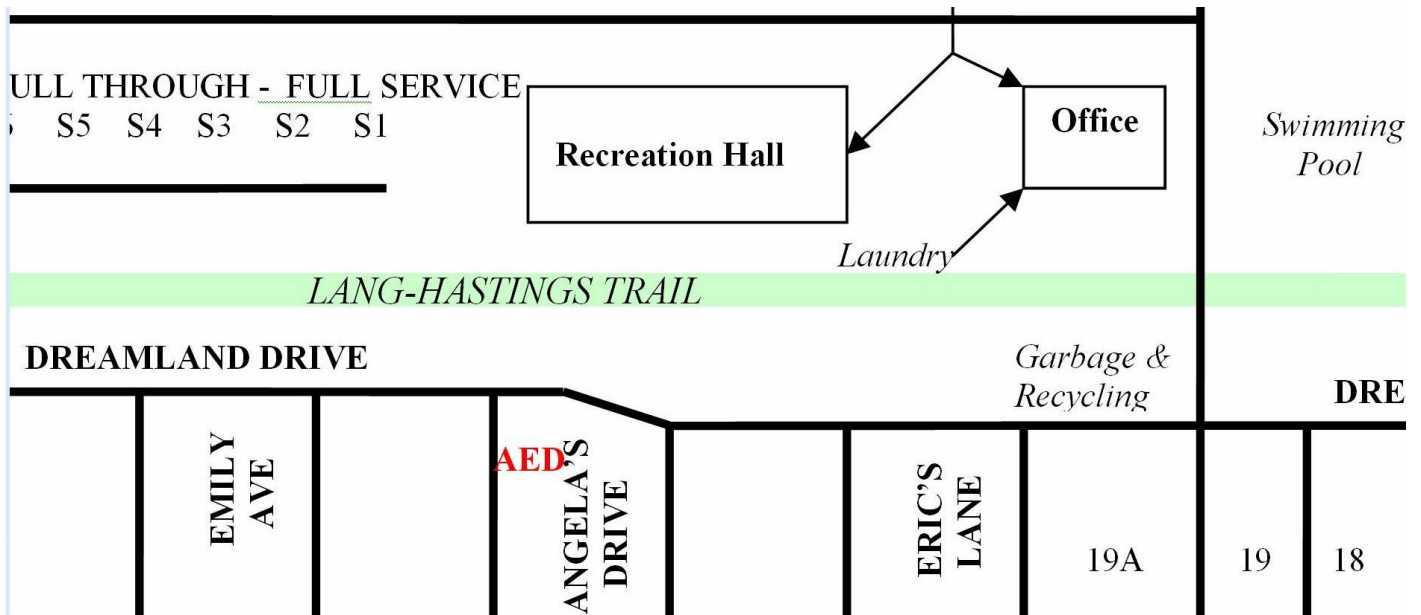

- a) **Park staff and/or park residents should come to your location to assist.**
- b) **If 911 has not yet been called, ask one of the first responders to make the call.**
- c) **If it appears that the Automated External Defibrillator (AED) may be required for the emergency, one of the first people to arrive should retrieve the AED from the cabinet at the corner of Dreamland Drive and Angela's Drive.**
- d) **One of the responders should proceed to the front gate with a gate card to allow emergency vehicles into the park, and direct them to the location of the emergency.**
- e) **Notify park owners. Ensure the park owners (Albert & Zita Crowley and family) are aware of the emergency.**
